- 1 All components except valve bodies are available as replacement parts.
- 2 Each replacement PTFE seat kit contains two seats.
- 3 Each replacement O-ring kit contains all the O-rings required to refurbish a particular size True Union Ball or Check Valve (regardless of model or style), or a minimum of two pipe unions.
- 4 Polypropylene filled with glass micro-beads.

## **Features**

- Rated at 150 psi with non-shock water service at 73°F
- Designed with an energizer O-ring beneath the seat-carrier, Model C valves automatically adjust for seat wear.
- Full port design produces minimum flow restriction with the lowest possible pressure-drop.
- Valves are manufactured and assembled without exposure to silicone compounds.
- Distinctive red handle indicates "open/close" and direction of flow at a distance.

<sup>1</sup> Handle is not symmetrical about centerline. Dimension shown represents the longest operational radius, but the handle position must be rotated 180° from that shown for the 4" size.

<sup>2</sup> Weight shown represents the polypropylene threaded figure. 3  $C_{\rm V}$  values were computed for basic valve laying lengths (G).

<sup>4</sup> No flanged figures are offered in any size for natural PP.
